ACHIEVEMENTS

Applied end to end image processing pipelines and model optimization, while independently handling dynamic database management and server deployment with Nginx for production environments.

EXPERIENCE

Software Developer

Alxicorn (**Remote**)

February 2025 - April 2026

- Built a vision based web automation engine using Python, OpenCV, RapidFuzz, and OCR, achieving 95%+ UI element detection accuracy across multiple websites.
- Increased automation reliability by 40%+ through hybrid OCR, fuzzy matching, and template recognition, minimizing failures caused by dynamic UI changes.
- Implemented human like mouse and keyboard automation with PyAutoGUI and pynput, enabling interaction with Cloudflare-protected websites without Selenium.
- Reduced recovery time by 80%+ by implementing checkpoint based workflow orchestration with FastAPI, SQLAlchemy, and PostgreSQL, allowing interrupted jobs to resume automatically.

Software Developer

Smart Field Service Ltd. (**On-Site**)

February 2025 - April 2026

- Developed 6+ production web applications using Django, DRF, Express.js, PostgreSQL, MySQL, JWT, and Hugging Face.
- Built AI powered features including computer vision, RAG chatbots, medical image classification, facial recognition, and social media automation, improving model accuracy by 20%+ through fine-tuning and data optimization.
- Designed scalable REST APIs, database architectures, authentication systems, and integrated third party services such as Facebook Graph API, YouTube Data API, SSLCommerz, and RTSP.
- Owned the complete development lifecycle from requirement analysis and backend development to testing, deployment, bug fixing, and production support.

MIS intern

Domino's Pizza Bangladesh Ltd. (**On-Site**)

October 2024 - January 2025

- Roster prediction using the 5 month ordering data
 - Data analysis on pizza topping waste minimization
 - Data visualization on the weekly sales report
-

SKILLS

- **Python Libraries & transformers:** TensorFlow, Pytorch, NLTK, OpenCV, CrewAi, Hugging Face, OpenAI, Ollama
 - **Backend:** Django, FastAPI, Flask
 - **Database:** MySQL, PostgreSQL.
 - **Frontend:** React, Tailwind CSS, Bootstrap.
 - **GitHub CI/CD pipeline, VPS, & Postman**
-

EDUCATION

Bangor University (2026 - Present)

- MSc in AI & Data Science

BRAC University (2020 - 2024)

- BSc in Computer Science
